Since arriving on the Danish Jazz scene in 1981 this elegant and explosive musician has been searching relentlessly into the realms of experimental and contemporary music. A truly original and virtuoso voice, performing in bands such as his own 11-pieceroots/blues/jazz oriented **Fredrik Lundin Overdrive**, the improv-trio **Sound of Choice** with Hasse Poulsen, the ECM-recording and border-crossing **Jon Balke Magnetic North Orchestra** and the jazz quartet **Jonas Johansens Move**. Also he is a distinguished composer for contemporary ensembles and jazz groups.

His latest album with **Overdrive**, "Belly-up" deals with the classic music of blues legend Leadbelly, whereas the improv-trio **Sound Of Choice**' brand new release, "Rugby In Japan", is a tour de force through almost every imaginable kind of music and sound scape, ranging from a frenetic and very virtuoso electronic improvisation to a beautiful lyrical song, from dark, mysterious wanderings to heavy metal jazz.
